BIG SALE OF LOTS!

In Elba Ala., at Public Auction, September 26, 1910, Beginning at II:00 A. M.

On the day and hour above tated I will sell at public auction, in the reservoir grove, near the residence of I. T. Law, on Martin Heights FIFTY of the prettiest and most desirable ots in E ba. These lots all face on streets hat have already been graded. They range from 80 to 172 higher than court house square in Eiba, as shown by the survey made by the water works engi eer at Elb . All of them re considerably less than half a mile from Pea River bridge- All are close to the business portion of Elba. Every one of them is above the fog and dampness of the river valley, and there are no musquitoes. Physicians say nearly every body is health er and better off living on high elevations. Each of these lots is well drained. well locat and a fine place to live.

ABOUT ELBA AND ELBA PROPERTY.

ELBA OF TO-DAY.

The towns of this section are solid and substautial; no one who has bought lots or improved property in them has lost money, but all of them have seen their money grow in town property, some making profit of several hundred per cent in short time. Elba is solid and substantial town; many fine buildings, considerable wealth, it 18 building and developing without a boom; two brick stores built, brick office building being built, other brick buildings being changed and improved, several nice new residences all this year. Property at Elba steadily goes up, and it always rents well. Good churches. finest school in South Alabama, good people, electric lights and artesian water are some advantages. Number of wealthy and desirable people from distance bave come to Erba this year, among them being S. W. Boyd, James Myhand, Judgo Rigg, J. M. Hickman, F. W Simmons. Thus Etba is growing and developing under present con-

ELBA'S FUTURE GROWTH.

I have showed how Elba property is a safe and profitable investment with only present conditions prevailing. But the best feature about Elba property is that it is not only certain to grow in value at a steady rate of moderate growth, but it is certain to grow with leaps and bounds in the near future-WHY? The large area of wild farm lands near Elba is being brought under the plow, and soon Elba will be one of the very best agriculturally supported towns in this section. But there is something bigger and greater than this; AT ELBA is the finest undeveloped water power which is the most cheaply and read:ly available of any in the South. It is sure to be harnessed and running factories in the immediate future. The water power and factory development that is sure to come to Elba will support city of many thousands, AND IT IS SURE TO COME. Then Elba is sure to have more railroads. The logic of traffic and shortest ditances and big hau's will bring them sure, and E!ba, now a safe, solid growing town, will soon be a thriving, hustling CITY.

I could wait and sell these lots at great prices in a few years; but I want to sell a pertion of my holdings now, and spend the money. It is to your advantage that I help you put part of your savings in a good town that is safe and solid. Real estate is one of the best and safest investments on earth, and there is no better town than Eiba: and the best of the best is on the hill in East Elba.
